Donnelly Hohe GmbH & Co, KG, the entire disclosure of which is hereby incorporated by reference herein.

IN THE ABSTRACT:

Please delete the Abstract on page 22 and replace it with the following new paragraph:

-- A mirror mount assembly is adapted for mounting to an interior surface of a windshield of a vehicle and for pivotally mounting an interior rearview mirror assembly thereto. The mirror mount assembly includes a mounting base for mounting at the interior surface of the windshield, an accessory housing extending generally downwardly from the mounting base, and at least one accessory positionable within the accessory housing. The mounting base includes a ball member for pivotal connection to the mirror assembly. The accessory may be one or more of at least one illumination source, a microphone, an attachment member, a compass sensor, an antenna and an interface button. --

A new Abstract sheet is attached.

IN THE CLAIMS:

✓ Please cancel claims 1-47 as originally filed.

Please insert new claims 55-57 as follows:

55. The mirror mount assembly of Claim 51, wherein said illumination source comprises at least one light emitting diode.

56. The mirror mount assembly of Claim 55, wherein said illumination source comprises a plurality of light emitting diodes.
